## Part III DETAILED ACTION

Claims 1-67 are currently pending.

## Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-21, drawn to method for determining nucleic acid sequence, classified in class 435, subclass 6.
- II. Claim 22, drawn to nucleic acid sequencing, classified in class 536, subclass 25.3.
- III. Claims 23-46,66, drawn to method for detecting tagged analytes, classified in class 436.
- IV. Claims 45-58,67, drawn to computer-readable medium and computer system containing thereof, classified in class 369, subclass 172.
- V. Claims 59-65, drawn to a kit, classified in class 435, subclass 810.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as independent and/or patentably distinct method which have different effects, different modes of operation and different steps.

1

Serial Number: 09/945238

Art Unit: 1631

The computer-readable medium and computer system of Group IV can be utilized in voltametric measurements not confined to nucleic acids addressed in the instantly claimed methods.

The kit of group V can be used in other labeling methods unrelated to cyclic voltametry based methods as instantly claimed.

Because these inventions are distinct for the reasons given and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, and the necessity for non-coextensive literature searches restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (571) 272-0713. The examiner can normally be reached on 9am-5pm.
